

# GBNCC

The Center is situated in the heart of the community of the immigrants in need of its services. The Center stands in a perfect position to be the centerpiece

between differing groups of people to help overcome the economic, cultural, and language barriers that exists.

The Center has the adequate space, ideal location, and the concerned individuals who are committed to seeing people succeed academically, as well as socially.

Additionally, in an effort to help our students become familiar with the culture, we take them on field trips to social and historical places around Boston. There is a sense of trust and safety attached to a "Faith-based Center" that makes it an ideal place for people to seek help for themselves.
